DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Samsung Electronics.

Regarding claims 2 and 5, Samsung Electronics discloses a mobile station transmitter (Figs 9-12, EU) for a mobile communication system comprising a dedicated physical control channel (DPCCH) (Figs 1 or 9-12, DPCCH) for transmitting control information including a power control signal (See Page 1, Sec 1, DPCCH used for transmitting pilot symbol, power control bits etc...); a dedicated physical data channel (DPDCH) for transmitting user data or signaling data (Fig 1, DPDCH); a controller for gating a switch for gating a signal on the dedicated control channel such that when there is no dedicated data channel signal to be transmitted to a base station for a predetermined time, the control information is transmitted in a partial duration of a predetermined one of slots constituting a frame (Page 1, Sec 1 discloses a gating on/off a signal on the DPCCH when no data for transmitting on the DPDCH, See sec 3, UE send DPCCH signal only fractional time duration).

Regarding claims 3-4 and 6, Samsung Electronics discloses the control information includes pilot symbols, a transport format combination indicator (TFCI) bits, and feedback information (FBI) bits for a phase difference between at least two transmit diversity antennas
